

BRABOURNE
COMMUNICATIONS

Make Huge Savings On Your Maintenance Costs With **BrabourneControl**

BrabourneControl is a powerful tool that integrates your BMS with your on site radio system, providing a single device from which to monitor and control your HVAC, lighting systems, access points, water, energy and other building systems. It provides a mobile communications solution for premises managers, facilities managers, maintenance managers and other key staff.

Using the latest digital radio technology you can now view multiple systems status and alarms on your handheld radio. **BrabourneControl** allows you to connect your on site digital radio system directly to your **BMS**, **fire alarm** and **intruder alarm** alerting you **immediately** to any alarms and ensuring you stay ahead of any developing incident.

BrabourneControl

BrabourneControl helps to reduce costs by improving staff productivity and extending equipment life

- Display status of plant and equipment in real time from anywhere on site
- Control your plant and systems remotely
- Issue work instructions to engineers who are the nearest and with the most appropriate skills saving time and money
- Efficiently manage on site power systems to reduce energy consumption, save costs and reduce CO₂ emissions
- Helps to ensure buildings are more comfortable places to use
- Allows you to optimize plant and machinery reducing maintenance costs and extending equipment life
- Includes built in personnel alarms – emergency, lone worker and man down improving staff safety
- Integrates with your on site fire and intruder alarms – allows you to deploy resources quickly and effectively when an alarm is activated
- Connects to your on site telephone system – allows you to stay in contact with all others on site – not just radio users
- Easy to use – minimal training required
- Wide coverage area – operates on or off site
- Provides 24 hour/365 days a year cover – highly resilient fail safe system
- Ensures user buy in – only one device need be carried for multiple tasks
