# 4038 3G TAC Message Software - P/N 4090-04-38 (Win)

- **Messaging over HF networks**
- **Chat interface: Broadcast and Point-to-point**
- **Compression, Resumption, Prioritization**
- **Text, SMS, Email, File Transfer, Form and Report messages**
- **SMTP, POP3 Email interface**
- **Delivery Notification**

4038 3G TAC Message is designed with strategic and naval HF operators in mind. It provides HF communications with a familiar smartphone-like user experience on a PC or Laptop. Chat Messaging and File Transfer are available from a convenient and easy to use interface. Email messages can be sent and received using well known email clients such as MS Outlook™. Data communications on the HF network benefit from the robust STANAG 4538 3G packet modem. SMS is available via GSM modem.

4078 3G TAC Command Software - P/N 4090-04-78 (Win)

- **Situational Awareness & Blue Force Tracking**
- **Built-in Offline Base Maps**
- **Touch-screen Design Option**
- **Text, SMS, Email, File Transfer, Form and Report Message Support**

4078 3G TAC Command is designed with military commanders in mind. The software is designed for touch-screens and lends itself to be used on rugged tablets. Situational Awareness using NATO standardised symbols provides the operator with a view of friendly unit positions (Blue Force Tracking), enemy contacts, reference points and geo-fences. Chat Messaging, Email Messaging, Form Messaging and File Transfer is also provided.

4079 3G TAC Command Centre - P/N 4090-04-79 (Win)

- **Situational Awareness & Blue Force Tracking**
- **Built-in Offline Base Maps**
- **Chat interface: Broadcast and Point-to-point**
- **Compression, Resumption, Prioritization**
- **Text, SMS, Email, File Transfer, Form and Report Message Support**

4079 3G TAC Command Centre is designed with military commanders in mind. Combining both the 4038 3G TAC Message and 4078 3G TAC Command software in one program, TAC Command Centre is designed for touch-screens and lends itself to be used on rugged tablets. Situational Awareness using NATO standardised symbols provides the operator with a view of friendly unit positions (Blue Force Tracking), enemy contacts, reference points and geo-fences. Chat Messaging, Email Messaging, Form Messaging and File Transfer is also provided.
